Westfield, Indiana | 317-979-6050 | austinbdalton@live.com |

PROJECT MANAGEMENT • ENTERPRISE IT OPERATIONS • AEC PROJECT DELIVERY

PROFESSIONAL SUMMARY

Project manager and IT professional with a decade of commercial development project management experience and additional enterprise IT operations leadership. Experienced in coordinating multi-year initiatives from planning through completion, including budgets, schedules, contractors, vendors, risk resolution, and stakeholder communications. Combines Architecture, Engineering, and Construction (AEC) project exposure with hands-on experience supporting enterprise identity, endpoint, and Microsoft 365 environments. Currently supporting Gaylor Electric's IT operations and seeking to contribute cross-functional delivery leadership to strategic technology initiatives.

CORE COMPETENCIES

Project Planning & Scheduling • Budget Oversight • Vendor & Contractor Coordination • Stakeholder Management • Risk & Issue Resolution • Resource Coordination • Operational Planning • Process Documentation • Cross-Functional Delivery • Enterprise IT Systems • Escalation Management • Change & Implementation Support

PROFESSIONAL EXPERIENCE

IT Desktop Support | Gaylor Electric | April 2026 – Present

- Support enterprise technology operations across Windows and Apple environments, collaborating with IT teams and end users to resolve technical issues and maintain business continuity.
- Administer and troubleshoot services and devices using Microsoft Intune, Entra ID, Active Directory, Microsoft 365, SCCM, Exchange, NinjaOne, BeyondTrust/Bomgar, Teams Admin, and Logitech room technologies.
- Coordinate peripheral purchasing through vendors and improve operational documentation and recurring IT workflows.
- Implemented network-printer data collection monitoring and developed Excel tracking to analyze page usage and inform supply planning; monitoring coverage was limited to network-connected printers.

IT Operations / Tier 4 Service Desk Lead | SelectQuote / SelectRx | 2025 – 2026

- Led high-level technical escalations and coordinated resolution across IT support teams, administrators, and external service providers in a business-critical environment.
- Supported user access, endpoint operations, and incident response coordination across Active Directory and a multi-domain environment.
- Developed and refined support procedures and operational documentation to improve consistency, escalation handling, and service delivery.
- Worked with enterprise support platforms and administrative tools, including Google Admin, Active Directory, and service management systems.

Project Manager | Edgerock Development LLC — Westfield, IN | 2015 – 2025

- Led planning and delivery of multimillion-dollar commercial development projects, overseeing budgets, schedules, resource coordination, and project execution.
- Managed multimillion-dollar project budgets and financial tracking; reviewed invoices, monitored costs, and coordinated with external partners to address discrepancies and maintain budget visibility.
- Coordinated up to five vendors on project activities while aligning engineers, contractors, utility providers, municipalities, and other stakeholders around dependencies, approvals, and deliverables.
- Owned project schedules, resource assignments, and delivery milestones; identified risks, resolved roadblocks, and coordinated decisions to keep complex commercial development work progressing.
- Conducted financial feasibility, competitor, customer-demand, and location analyses for the Pro X athletic facility; served as liaison between the project owner and contractor to communicate research findings, clarify business requirements, and support development planning.
- Developed documentation, tracking processes, and operational workflows to strengthen project coordination, accountability, and management visibility.

SELECTED TECHNICAL EXPERTISE

Identity & Collaboration: Active Directory, Entra ID, Microsoft 365, Exchange, Google Admin | Endpoint & Support: Intune, SCCM/ConfigMgr, NinjaOne, BeyondTrust/Bomgar, Windows 10/11, iOS/iPadOS | Operations: ServiceNow, Freshservice, Jira, Microsoft Project, Smartsheet, Excel, vendor coordination

EDUCATION

Bachelor of Science, Cybersecurity — Purdue University Global, 2025

Associate of Applied Science, Information Technology — 2023

CERTIFICATIONS

Google IT Support Professional Certificate | PMP: Not currently held

ADDITIONAL PROJECT WORK

PhotoHut Network Infrastructure Upgrade (Academic Simulation): Planned a simulated infrastructure modernization with network/server design, procurement comparison, resource assignments, implementation milestones, testing, and transition documentation. Clearly identified as academic simulation, not a production deployment.
